Experience

Discoders — Lead Developer / Owner

Remote / April 2019 → Current

As the lead developer on Discoders, I worked with clients to develop applications for their companies. Through working with our clientele, I have developed numerous backend applications using **Python, Node.JS, and GoLang**. I have also worked on programs using **Electron** and **React.JS**.

Chong Hing Jewelers — Backend Developer

Remote / 2019 → 2020

As a backend developer at Chong Hing, I became familiar with the Shopify API and used **Python** to develop backend applications and web scraping tools.

Peachy Pings — Backend Developer

Remote / 2018 → 2019

As my first developer position at Peachy Pings, I focused on using **Python** to create monitoring scripts and automation software. I was introduced to working in a team setting along with reverse engineering and using atypical methods to create tools to aid resellers in their purchasing of sought after sneakers and clothing.
