Experience

Constantly Create Shop —— Software Developer

New York City / June 2020 → Current

At Constantly Create Shop, I work to digitize the business to allow easier access for clients. I also work to automate a lot of the manual work where possible in order to speed up the production processes. I utilize the Shopify API to interact with many web stores as well as Docker for easy deployment of applications. Some projects include:

- Automating label printing
- Automating client invoices on a day-to-day basis to increase capital
- Data analytics
- Internal dashboard

Monitored Solutions LLC —— Developer / Project Manager

Remote / March 2020 → Current

As a developer at Monitored Solutions, I have worked on teams to create web applications using **Node.JS** and **MongoDB.** I have also utilized **GoLang** in order to develop effective web scraper and website monitors.

Discoders —— Developer / Owner

Remote / April 2019 → February 2020

As the sole developer on Discoders, I worked with many clients to create applications for their businesses. Through working with our clientele, I have developed numerous backend applications using **Python, Node.JS, and GoLang.** I have also worked on programs using **Electron** and **React.JS**.

Chong Hing Jewelers —— Backend Developer

Remote / 2019 → 2020

As a backend developer at Chong Hing, I became familiar with the Shopify API and used **Python** to develop backend applications and web scraping tools.

Projects

OnDemand Site - **ondemand.gg**

April 2020

A site for purchasing subscriptions to website monitors. Made for Monitored Solutions LLC. Utilizes **Next.JS, Node.JS,** and **MongoDB**

SpectreAIO Site - **spectrebots.com**

June 2020

Freelance work done for Spectre Labs. Made with pure **HTML & CSS,** using Javascript for conditionally rendering content.

Storage Site - **storage-site.now.sh**

April 2020

A site based off of a Figma design, made responsive for mobile.
